Target:

24408 - 0008

Viewer: Daz
Method: CRV
Friday, 25 April 2008

The target feels:

Like a warm location which is made of land which is hot and dry with structures next to liquid which is water and an energetic is involved.

Land

Thick, solid, warm, baked and dry. An energetic feels like it is part of or interacting with the land. Part of this feels below the ground level.

Structures:

Feels like a cluster of structures, which are solid, layered, structured and man made. Some of the structures feel boxy and linear (1), another feels long and curved (2). A third structure feels tall and linear (3).

- (1) Page6 sketches. Wide, linear, strong edged, pinnacle, with a large internal space. Rectangular or box shaped.
- (2) Page 9a & 10 sketches – curved, solid, grey, smooth, constructed, containing, wedge shaped structure. This feels close to a liquid – water.
- (3) Pages 7,8,9,9a sketches – tall linear, overlapping, constructed, repeating, angular, cold, hard, metallic structure. Parts feel embedded into the land.

Energetic:

Sparky, erratic movement/behaviour, humming, dense, funnelled and channelled, power. This feels electrical in nature.

AOL's of:

Pond, electricity, rock, pylon, rotting, thunder storms, hanger, wigwam, oil well, hydroelectric dam.

Notes:

Found this a hard confusing target for some reason?
